Section-V

SPECIAL CONDITIONS OF CONTRACT (SCC)

5.1 APPLICABILITY:

These terms and conditions are in addition to the General terms and conditions specified in earlier Sections of this tender document. These special terms and conditions as detailed in this section in the following clauses shall prevail upon the General terms & conditions, should there be any discrepancy or conflict or contradiction between the two.

5.2 INTRODUCTION:

The Company is involved in the mining, beneficiation, processing and marketing of various minerals like Phosphate, Limestone, Gypsum, Selenite and Lignite etc. The mining & sizing of limestone at Sanu mines is being carried out since 1988.

5.3 LOCATION AND ACCESSIBILITY OF SITE:

Sanu Limestone Mines of RSMML are located on Jaisalmer-Ramgarh Road maintained by Border Roads Organisation at a distance of about 54 kms respectively from **Jaisalmer Town**.

Low silica limestone occurs as a sedimentary bed of about 3 to 6 meters thickness from the surface. The SMS grade limestone is almost outcropping, but at some places the bed is overlain by alluvium or dumps of rejects or Sand Dunes of varying height. The pit bottom confirms to the contact zone between SMS limestone bed and chalky limestone bed. In general, the limestone boulder studded/embedded in clayey matter etc. in upper layer followed by massive hard compact bedded layer. The expected recovery of the finished product (+40-80 mm and +30-50 mm or any size range between +30-80 mm) out of ROM feed to the crusher is in the range of 40% to 46%. Rest 54% to 60% are the rejects/fines segregated during the course of screening in two different grades viz. High Grade rejects (HGR) and low-grade rejects (LGR).

After sizing, the low silica limestone gitti will be despatched through weighbridge to consumers. Rejects/fines namely HGR and LGR will be hauled back to work out pits for backfilling and levelling to the original ground level.

The tenderer should acquaint itself fully with relevant factors like recovery of finished product in the excavated ROM, crushing characteristics of the limestone, extent of the requirement of drilling, blasting etc., conditions of working site including availability of infrastructure facilities at site, and quote its rates accordingly. The Company will not accept any claim due to ignorance of these, or, any other factors required to fulfil the work during the currency of the contract.

The noise level of any machine (as measured inside the operator's cab or in nearby areas) shall not exceed the standard prescribed in the MMR, 1961. The company may stop operation of any machine if the noise level of which is found to be above the prescribed limit.

5.9.4 The contractor shall have to make adequate lighting arrangement at his own cost for illuminations in working areas of mining after day light hours so as to meet the statutory requirement wherever required as per MMR, 1961. Contractor has to deploy Portable lighting high mast tower (telescopic type mounted on four wheels) along with generator at each working pit.

5.10 DUST SUPPRESSION:

5.10.1 The Co-operative society shall have to take effective measures at its own cost & expenses for suppression of dust generated during process of loading, drilling, blasting, loading, unloading, transportation, etc in the working areas & on the haulage roads, by means of water sprinkling, wet drilling, water spraying or any other suitable method, etc so that the dust concentration in such places do not exceed the limit prescribed under MMR, 1961 or as stipulated under MOEF or Rajasthan Pollution Control Board. Also, the Co-operative Society shall take effective dust suppression measures including adequate water spraying, at the various dust generating points in the mines inclusive of relevant points of Departmental C/S plant and haulage roads. For this purpose the Co-operative Society will make necessary arrangements for adequate supply of water. Non-availability of water for dust suppression will not be an excuse for non-compliance of this clause. In case the dust concentration is found to be more than the limit referred above then the company may make arrangement for dust generation at the cost and expenses of the contractor. The approach road to site of crusher and active haul roads inside the premises must be paved or hard surfaced.

5.10.2 Co-operative society shall also deploy a competent engineer as per provision of MMR, 1961 as part of supervisory staff.

5.10.3 The Co-operative society shall have to fence the mining area as per provision of Regulations 115 & 117 of MMR, 1961 & in manner as directed by company at its own cost & expenses including the cost of the material. They can however use overburden/ interburden/ waste material for the purpose.

5.10.4 In case of failures of the Co-operative society to ensure dust suppression as required above, the Company may make such arrangements for dust suppression at risk and cost of Co-operative Society, apart from taking other actions as per the contract.

5.11 VOCATIONAL TRAINING:

Before any person is employed/ deployed by the contractor in mines. It shall have to undergo a course of vocational training as per provision of MVTR, 1966. Such vocational training shall be imparted by the company & shall not charge any amount from the contractor for imparting such vocational training. However the contractor shall have to make available the persons for attending such vocational training as per schedule to be imparted by the company. The contractor shall pay the wages to the trainees for the training period.

5.12 MEDICAL EXAMINATION:

Every person deployed by the contractor in the mines shall be subjected to initial & periodical medical examination(s) as per the provision of the Mines Rules, 1965. Such medical examination (s) shall be arranged by the company & actual expenses incurred by the company for such medical examination (s) shall be borne by the contractor. However, the company shall not charge any service charges for organization such medical examination.

5.13 DRINKING WATER:

In case of failure of the Co-operative society to arrange for supply of drinking water to its staff/ working members at the working places/ points. Such arrangement may be made by the company & entire cost thereof together with such charges as may be levied by the company shall be recovered from the bills of the contractor & or from its security deposit.

5.14 SAFETY APPLIANCES:

The Co-operative society shall provide all protective & safety appliance such as helmets, safety boots, ear muffs, dust mask, safety goggles etc. to their employee at his own cost & comply with all relevant provision under Mines Act, 1952 & MMR, 1961 & rules made their under. In case of failure to comply the norm by the Co-operative society, the company shall provide the same to the employee of the co-operative society & the payment with additional charges @ 15 % of actual cost shall be recovered from the contractor's bill.

5.15 OVERBURDEN/ INTERBURDEN/ WASTE MATERIAL:

All preparatory work shall have to be undertaken by the co-operative society, which also includes removal of waste material/ interbred/ overburden of varying height up to 2 mtrs at places in the area allotted for mining and also as per working plan provided by the company. In general, the area is having flat topography with little or no overburden.

The waste overburden/ interburden/ Waste material and the bye products (if any) shall be the property of the company and the co-operative society will have no claim whatsoever over it. Bye products shall have to be stacked separately by the co-operative society as per instructions of the authorized representative of the company and no separate payment will be made for such stacking.

Machines may have to be shifted from one face to other as per work requirement / instructions of engineer in-charge.

5.16 QUALITY OF PRODUCTS, SERVICES, ETC.

5.16.1 The Company will have the absolute right to reject the whole or part of any stock of materials, if in the opinion of the Company or its authorized representative, it is found to contain substandard quality of materials as specified in the tender &

requirement of company. Such rejected materials shall be recycled through crushing & screening plant at no extra cost to Company and as per its direction.

- 5.16.2 The Co-operative Society shall remove/ raise/ excavate/ break/ sort and/ or loads the particular material as specified after taking prior permission in writing from the Unit In-charge/officer-in charge of the Company as authorized representative. In case any wrong material is raised/ excavated/ broken/ sorted and/or loaded, then the Co-operative Society shall be responsible for any loss caused to the Company and it shall have to bear all such losses, including the cost of material, freight charges and any other claim(s).

5.17 SECURITY & WATCH AND WARD

- 5.17.1 The Co-operative Society shall be responsible under the contract for safety, security, watch & ward etc., of the Company's properties under the possession of the Co-operative Society including stocks of mineral & mineral products produced by Co-operative society.

- 5.17.2 The Company shall carry out physical verification of the stocks of mineral & mineral products & other properties of the Company in possession of the Co-operative Society. Such physical verification will be carried out on monthly basis. The Co-operative Society shall have option to associate its representatives during such physical verifications. Results of such physical verification shall be binding on the Co-operative Society.

5.18 CONTRACT TO BE EXECUTED BY THE CO-OPERATIVE SOCIETY ONLY:

In view of prohibition of employment of contract labour in limestone raising including breaking, sizing, sorting etc. under the Contract Labour (Regulation and Abolition) Act, 1970; this tender has been called from Co-operative Societies which are registered under the Co-operative society act 2001 or any other Co-operative society act of India or who forms the Co-operative society and get that registered and produce the relevant certificates along with the list of members of the Co-operative Society, within 30 days from issue of LOA / DLOA before commencement of work. No person who is not a member of the Co-operative Society shall be allowed to work in the mines.

5.19 SCOPE OF WORK:

Co-operative society shall provide set of suitable & adequate capacity of HEMM for mining, etc, and feeding of ROM into departmentally operated company's crushing and screening plant, from the specified pit, to produce finished products (SMS grade Limestone gitti). Scope of work under this contract shall also include:

- 5.19.1 Excavation low silica limestone from the area earmarked in the enclosed plan at Annexure IV. The average lead distance of transportation of ROM from mine face to the static ROM grizzly of the Company's Crusher shall be approximately upto 5.00 Km. The location of the Departmental Crushing & Screening plant at Mine No.2 has been specified in the enclosed Plan at

Annexure IV. Deployment of requisite number of hydraulic excavators (minimum 1.2 M3 bucket capacity) with back-hoe attachment, Dumpers (minimum 16 MT capacity), Crawler mounted drills with inbuilt water injection system for wet drilling with matching Compressors, Front-end loaders, Bull dozers, Four wheeled Water tankers, etc. and other allied machineries along with their operators to be utilized for Drill face preparation (wherever if required so) Drilling and Excavation of ROM including associated Clay/ sand Waste/ Murrum etc, at/from the earmarked pit and upto the depth as may be directed by the Company (which would be approx. upto a maximum of 5 m.) from time to time. Transportation of such excavated ROM Limestone (including associated clay/ waste/ murrum etc.) from mine face to the Static Grizzly at ROM Hopper of the departmental crushing & screening plant and unloading of the same into it, during the notified shifts by the company at Company's Sanu Limestone Mines Distt. Jaisalmer. Deployment of higher capacity equipment and machinery may also be considered, if so deemed necessary.

- 5.19.2 Loading of HGR, LGR and sub grade Material etc, either by gravity or mechanically by excavator or front end loader into dumper and its transportation from the crusher plant site to the rejects dump /disposal site /mined out pit or any other specified location by the company from time to time for the purpose for backfilling/ unloading (in the presence of spotter), dozing, compaction and leveling (to the original level) of the HGR and LGR and/or stacking of sub grade mineral. The Co-operative society shall have to level the rejects dump area so as to keep the level of the back filled rejects dump area up to the original ground level.
- 5.19.3 ROM should be made suitably moist, using water, so that the dust do not get air borne during loading, hauling and unloading process of ROM.
- 5.19.4 Deployment of sufficient manpower at Static Grizzly of ROM Hopper for its regular clearing of the oversize boulders /interlocking of the material over it.
- 5.19.5 Deployment of sufficient manpower at Reject (HGR and LGR) Sub grade Material Hoppers for loading of rejects into dumpers by gravity for its regular evacuation from respective hoppers.
- 5.19.6 Removal of the Sub grade Material from the Screen House (VS-17) during the operation of the CSP, by deploying front end loader upto a distance of 500 mtrs and thereafter its loading by front end loader / excavator for disposal into pits worked out by the co-operative society.
- 5.19.7 Lifting of the spillages generated during the operation of CSP near reject bins, VS-17 and product bins by deploying mechanical means i.e., loader etc, and, whereas the places near & around tail end pulley's of BC-3 and BC-7 in the tunnel/ crusher house/ screen house & at any other place near CSP to the specified location(s), if require, it shall be removed by manual means.
- 5.19.8 In addition to above, the tenderer shall also clear the jamming of chutes, crushers, ROM hopper, reject & product bins & at any other places to the

specified location(s) in & around the CSP.If require, it shall be cleared / removed by manual means.

- 5.19.9 Recycling of rejected product, if any, in the CSP which includes making suitable stack for mechanical loading, its mechanical loading into dumpers tippers and unloading it into CSP.
- 5.19.10 Clearing of reject product from the center bins of the Product Hoppers to the ROM hopper or any other specified location, at regular intervals.
- 5.19.11 All incidental and/ or contingent works required for the performance of main works shall be done by the co-operative society at its own cost and expenses and the same would not qualify for any extra payment.
- 5.19.12 The work mentioned above will have to be performed by the members of such co-operative societies, which are registered under the Rajasthan Co-operative Societies Act. The society will not be allowed to hire workers. Any person who is not a member of co-operative society shall not be employed for the above work as it is prohibited under the Contract Labour (Regulation and Abolition) Act 1970.
- 5.19.13 Plantation, its nurturing watch and ward, watering etc. of specified species of plants (preferably fire wood plants) @ 2500 plants per annum or as directed by the government body etc. This includes cost of procurement if any of plants from the specified Nursery of Forest Deptt.
- 5.19.14 The haul road in the pit, up to the CSP, dump yards of HGR/LGR, stack yard of sub grade material etc, shall be constructed and maintained by the Contractor at its own cost and in accordance with the provisions of Mines Act, Rules and Regulations made thereof. The gradient of the haul road (including the ramp to crusher grizzly) shall be as per directions of the Company.
- 5.19.15 The scope of work includes works mentioned in special terms and conditions of the tender document.
- 5.19.16 The Co-operative society should acquaint itself fully with relevant factors like recovery of limestone in the excavated ROM, crushing characteristics of the limestone extent of the requirement of drilling, blasting etc., conditions of working site including availability of infrastructure facilities at site, and quote its rates accordingly. The Company will not accept any claim due to ignorance of these, or, any other factors during the currency of the contract.
- 5.19.17 Co-operative Society shall plan excavation of as much quantity of ROM limestone that shall be needed for production of 6.00 lac MT for the crusher per annum of crushed and screened low silica limestone gitti in the size range of +40 mm to –80 mm and +30 mm to –50 mm, or such sizes as may be required from time to time in any size range between +30 mm to –80 mm, keeping tentative & indicative monthly quantity of 50,000 MT.

- 5.19.18 The scope of work given here is indicative and the tenderer has to perform all the jobs to provide finished product and to fulfill all statutory requirements.

5.20 LIMESTONE EXCAVATION

- 5.20.1 Limestone excavation is to be carried out within the area earmarked in the enclosed plan at Annexure IV. The lead distance of transportation of ROM to the static ROM grizzly of the Company's Crusher shall approximately be 5.00 Km or actual distance marked in the Plan at Annexure IV.
- 5.20.2 All preparatory work shall have to be undertaken by the Co-operative society which also includes removal of waste material/ overburden/Sub grade Mineral from the surface, hauling it upto specified place and dump it there and level it/stack it as per direction of the company from time to time, to the satisfaction of the Company's Mines Manager before extracting limestone from any bench.
- 5.20.3 It shall be mandatory for the successful bidder to commence the mining operation from the maximum lead and then to retreat towards its C&S plant.
- 5.20.4 Excavation of limestone upto full depth shall be done in one or more benches as per provisions of the Metalliferous Mines Regulation, 1961.
- 5.20.5 Drilling of the blast - holes and Jackhammer drilling in boulders. . The design & layout of the blast holes & pattern of blasting shall be as per directions of the Company.
- 5.20.6 Back filling of overburden/ interburden/ waste material in worked out pits shall be as per direction of the company's representative. The height of the backfilled dump should not be more than 2.75 Mtr.
- 5.20.7 The Co-operative society will maintain the quality of limestone intact as available insitu and shall not make/ cause/ allow any contamination/ dilution. Any loss or degradation of limestone purity will constitute breach of contract and any loss or damage caused to the company on this account will be recovered from the bills/ security deposit of the Co-operative society.
- 5.20.8 Sorting to eliminate waste material/ interburden if needed shall have to be undertaken by the Co-operative society, at its own cost so as to ensure that chemical analysis of limestone produced confirms to the specifications prescribed in this tender document. No payment will be made for sub grade limestone produced by the Co-operative society and such sub-grade limestone shall be the property of the company.
- 5.20.9 It shall be the responsibility of the Co-operative society to ensure that neither any layer of steel grade limestone is left unexcavated nor any unwanted excavation of waste/ chalky limestone bed, below steel grade limestone bed is done. The Co-operative society shall be responsible for cost, losses, damages etc. for any loss or degradation of low silica SMS limestone on this account.

5.21 HAUL ROAD: -

- 5.21.1 The haul road in the pit shall be constructed and maintained by the Co-operative society at its own cost and in accordance with the provisions of Mines Act. Active haul roads inside the working premises must be paved or hard surfaced. The alignment & gradient of the haul road (including the ramp to crusher grizzly) shall be as per directions of the Company.
- 5.21.2 The work includes preparation and maintenance of roads in the pit, at the surface, in the dump yards, & in the crushing & screening plant as per the

specifications prescribed in statutory rules and regulations; for which no extra payments shall be payable to the Co-operative society.

5.22 REJECTS/UNDER SIZE FINES

- (i) The fines (less than specified size) shall not be included in the quantity of gitti.
- (ii) The waste dumps shall be properly leveled by dozing, grading etc. All machinery required for this and related purposes shall have to be arranged, installed and operated by the Co-operative society at its own cost & expenses.
- (iii) Fines generated during the process of gitti breaking shall be the property of the company. No payment for raising or gitti breaking shall be made for these fines.
- (iv) Co-operative society shall make entire arrangements for plantation work as specified elsewhere in this tender document, on the LGR dump-yard and along the Haul roads as directed by the Company, failing which the work shall be executed by the company at Risk and Cost of the society.
- (v) The fines generated in the process of gitti breaking shall have to be stacked separately as per working plan.

5.23 LOADING, UNLOADING, STACKING ETC.OF DIFFERENT PRODUCT (S)/BY- PRODUCT (S).

- (i) In case of dispatch from crusher site, loading will be automatic otherwise co-operative society shall stack the finished product(s) separately within 1 (one) km from the plant on its own cost.
- (ii) In case of dispatch from crusher site, loading will be automatic otherwise co-operative society shall stack the by product(s) separately within maximum lead distance of 2 (two) Kms from the plant on its own cost.

5.24 OWNERSHIP OF EQUIPMENTS AND HEMM

The successful tenderer has to submit the technical specifications alongwith Registration certificate of various equipment/HEMM installed propose to be deployed at mine before commencement of work. The co-operative society shall deploy & maintained adequate number of mining equipment for successfully execution of the Contract: The society shall not shift their deployed machine from Sanu mines to elsewhere without prior permission from the company.

5.25 NO PAYMENT SHALL BE MADE FOR THE FOLLOWING WORK

- (i) No payment will be made for sub grade limestone / by-product produced during the entire process of gitti breaking of Company's CSP. Such sub grade limestone / by-product shall be the property of the company.
- (ii) Finished Product(s) in the respective hoppers or lying at the stockyard, ROM at mine, overburden, HGR, LGR, Sub-grade Mineral and Rejected Product shall be the property of the Company and the co-operative society will have no claim whatsoever over it.
- (iii) Machines may have to be shifted from one face to other as per work requirement on the instructions of engineer in charge for which no extra payment would be made.
- (iv) The co-operative society shall have to dump ROM limestone on the grizzly of the crushing and screening plant after going over the ramp for which no extra payment shall be made.

5.26 ALLOTMENT OF AREA FOR WORK

- 5.26.1 The co-operative society shall be required to work, in general, within the area earmarked in the plan, Annexure IV, attached with tender document.
- 5.26.2 The Engineer-In-Charge shall have a right to stop the work in any part of the area assigned to the contractor & instruct the contractor to work in the alternative area. Decision of Engineer-in-charge shall be final & binding in this regard.
- 5.26.3 In case it is inevitable and mutually agreed upon to reduce allotment of area and/or shifting of work to other alternate area or stoppage etc. no claim for any damages/losses to the contractor in this regard shall be entertained by the Company.
- 5.26.4 Specified working area will be allotted, in writing by the authorized representative of the Company before commencement of the awarded work and the Co-operative Society shall restrict the working accordingly.
- 5.26.5 It will be at the discretion of the Company to withdraw the specified working area allotted to the Co-operative Society at any time without assigning any reason whatsoever and alternative area may be given if considered necessary by the Company. No compensation would be payable to the Co-operative Society for damages, expenses, etc., that may arise out of the aforesaid change of the working area.
- 5.26.6 The Co-operative Society shall carry out the mining operations systematically and strictly as per working drawings & instructions of Engineer in-charge. It will have to get the scheme of removal/ disposal/ stacking of the overburden and Ore, approved by the Company in advance and ensure compliance thereof during the tenure of the contract. In case the Co-operative Society violates this condition then it will be at the cost, expense and responsibility of the Co-operative Society and the Co-operative Society shall not be entitled to any charges or remuneration for the work done in such a manner.
- 5.26.7 The overburden/interburden shall be stacked in a limited space as specified by the company. Initial overburden shall be dumped over the earmarked OB. dump area. Such initial O.B. dumps would also be leveled to accommodate additional overburden layers. The Society shall have to bear the cost of stacking of overburden including cost of leveling, making ramp etc.
- 5.26.8 The height, width & slope of benches as also the width & gradient of haul roads shall be as per provision of MMR-1961, which shall be communicated to the Co-operative Society from time to time. Any change in these parameters as required by DGMS shall have to be carried out by the Co-operative Society at no extra cost to the Company.
- 5.26.9 Any changes in the height and width of benches, width and gradient of roads, height and locations of dump yards/ back fills etc. as directed by the statutory authorities will have to be implemented by the Co-operative society for which no extra payment/ charges shall be payable to the Co-operative society.
- 5.26.10 The Co-operative Society shall have to fence the mining area as per provisions of Regulations 115 & 177 of MMR-1961 and in the manner as directed by the Company, at its own cost & expenses including the cost of material etc. The Society can however use OB/ IB/ waste material for this purpose.
- 5.26.11 The rates quoted should include all leads, lifts & depths as per the working drawings & as per the terms & conditions of this tender.

**QUANTUM OF WORK, PERIOD OF CONTRACT, TIME SCHEDULE ETC.
COMPENSATION FOR DELAYS, SHORTFALL ETC.**

5.27 APPROXIMATE QUANTITIES OF WORK INVOLVED:

The Co-operative Society shall plan excavation of as much quantity of ROM limestone that shall be needed for production of **6.00 lac MT** for the Company's crusher **per annum** of crushed and screened low silica limestone gitti in the size range of +40 mm to -80 mm and +30 mm to -50 m, or such sizes as may be required from time to time in any size range between +30 mm to -80 mm, keeping tentative & **indicative monthly quantity of 50,000 MT.**

Note: -

- (a) The tender quantities are indicative.
- (b) The quantity mentioned above may change in writing by the Company depending upon the requirement of the company and/or demand of limestone from buyers.
- (c) The work shall have to be carried out as per plan, time schedule and sequence of operation as per direction of Engineer-in-charge.
- (d) The company reserves the right to make any alteration/addition in the area for the contracted quantity as above including allotment of work in other alternate areas.
- (e) The contractor shall have to abide by quarterly schedule of work.
- (f) In case at any time the performance of the contractor as a whole or in part is not found satisfactory, then the company will issue notice, giving seven days to improve the same. If the contractor fails to improve its performance within this period of seven days, then the company may get that part/ the entire work done by other agency at the risk & cost of the contractor without any further notice.

5.28 VARIATION IN WORK

The company reserves its sole discretion and right to vary the annual or total quantum of work under contract schedule as per applicable provisions of **Rajasthan Transparency in Public Procurement Act 2012 & rules 2013** and amendments made time to time.

5.29 ACTION TO BE TAKEN BY THE COMPANY IN CASE NON ACHIEVEMENT OF PRODUCTION AND TARGETS:

In case of failure to produce for a continuous period of 7 (seven) days due to breakdown of machine or any other reason for which the contractor is responsible and/or in cases of frequent breakdowns of machine resulting in loss of production, the Company in its sole discretion without prejudice to other remedies may terminate the contract & shall be empowered to engage other outside agency, at the risk and cost of the contractor for execution of remaining part of work of the contract.

5.30 WORKING HOURS:

The work of excavation shall be carried out during such hours as may be directed by the company.

5.31 TIME SCHEDULE FOR:

Commencement of work:

The Contractor has to commence the work within a period of **thirty (30) days from the date of issue of work order/Letter of Acceptance** only after formation of Co-operative society.

5.32 PERIOD OF CONTRACT:

5.32.1 The period of contract shall be 3 (Three) years from the date of issuance of letter of Acceptance by the Company. The Company at its sole discretion may extend the period of contract for a further period of six month on same term and conditions.

5.32.2 However, the company reserves the right of termination of contract at any time without assigning any reason by giving a clear notice of thirty days. Such termination shall not entitle the contractor for any claim whatsoever

5.33 EXTENSION OF SCHEDULE COMPLETION TIME:

5.33.1 If the contractor shall desire an extension of time for completion of work on the grounds of his having been unavoidably hindered for reasons beyond his control in execution of work, he shall apply in writing to the Engineer-in-Charge within 10 days of the date of such event, and the Company shall, if in its opinion (which shall be final and binding on the Contractor) reasonable grounds exist, authorize such extension of time as may in his opinion be necessary or proper. Whenever the Company grants such extension, this would be without prejudice to the Company's right to take appropriate action under this contract and without additional financial liability on the company.

5.33.2 Failure or delay by the Company to hand over the necessary drawings and instructions, or any other delay by the Company due to any other cause, whatsoever shall in no affect or vitiate the contract or alter the character thereof or entitle the Contractor to damage or compensation thereof, provided, however, that the Company without any financial liability may extend the time for completion of the work by such period as it may consider necessary or proper.

5.33.3 The decision of the company as to the need for grant of extension of time to the contractor shall be final.

5.34 COMPENSATION FOR SHORT FALL IN THE TENDERED QUANTITY:

5.34.1 In case of delay in commencing the production, the compensation @ 0.5% of the annual contract value on fortnightly basis will be recovered. The tendered qty. on pro-rata basis will be considered to calculate annual contract value. The compensation will be recovered by way of deduction from the bills payable to the contractor. Further the company may withdraw the DLOA and forfeit the earnest money deposit (EMD) & /or security deposit (SD) in case the compensation reaches beyond 2%.

5.34.2 The Company will provide the production targets of excavation on quarterly basis. The Co-operative society shall have to handle the mineral in accordance with these targets. In case, the quarterly targets are not given in writing to the

co-operative society then the targets shall be assumed one forth of the total annual targeted quantity as mentioned in the contract or any other specified annual quantity given to the cooperative society in writing during the pendency of contract. The Co-operative Society will have to ensure that in case of any shortfall in a quarter, the same shall be made up in the next quarter. However, failure of the co-operative society to achieve the cumulative target on six monthly bases (i.e. total combined target of two quarter considered for calculation of compensation) , Company will be entitled for imposing a pre determined and agreed compensation @ 20% of value of the actual short fall in quantity. Quantum of compensation shall be calculated considering the applicable contract rate during that period multiplied by an actual shortfall quantity. The compensation will be recovered by way of deduction from the running account bills payable to the contractor or any other amount due/ SD to the co-operative society.

- 5.34.3 Besides above, failure of the Co-operative Society to work as per scheduled targets continuously for three quarters, the company will free to get the work done by making alternative arrangements at the risk and cost of the Co-operative Society and also to recover it the full difference of cost of making such alternative arrangements from the bills or security deposit
- 5.34.4 The compensation will be recovered by way of deduction from the bills payable to the contractor / SD or any other amount due to the co-operative society. The above recoveries will be without prejudice to the other right and remedies available in the contract.
- 5.34.5 The shortfall of one quarter is to be made up in next immediate quarter, [the next immediate quarter is here termed as second quarter for the purpose of understanding the clause]. If this shortfall is not made up in second quarter, then compensation shall be levied on the shortfall of target of the preceding quarter on the applicable rate/s as on the conclusive day of the second quarter, and so on.
- 5.34.6 If annual scheduled quantity is not achieved by the contractor due to any reason beyond the control of the contractor, the annual schedule may be modified and/or completion time may be extended by the company. Compensation for shortfall will be recovered based on such revised target. Decision of the company, whether a particular reason for failure to achieve the target is beyond the control of contractor, shall be final and binding on the contractor.
- 5.34.7 The compensation so paid/and/or adjusted by the company shall not relieve the contractor from his/its obligations to complete the work under the contract or from any other obligations and liabilities under the contract.
- 5.34.8 If targeted quantity is not achieved by the contractor within contract period due to any reason beyond the control of the contractor, then company may consider waiver of the compensation, if levied. However, in such case the decision of the company shall be final and binding on the contractor.

5.35 RIGHT TO REVIEW PERFORMANCE:

- 5.35.1 The company reserves the right to review and assess the performance of the work at any time during the contract period. In case of poor or unsatisfactory performance and/or breach of any terms and conditions of the contract, the

company in its absolute right and discretion may take appropriate action including termination of the contract.

- 5.35.2 The company shall have absolute right to determine and ascertain the damages or losses suffered by it due to poor performance or breach of the terms and recover the costs thereof from the contractor from the security deposit or any sum due to the contractor from the company. The Company shall also have absolute right to get the work done from any other agency at the risk and cost of the contractor, in case, the contractor fails to perform the work continuously for more than 3 (three) days.

5.36 RISK & COST:

The company shall have full right to forfeit the whole security deposit and payment of other pending bills payable to the contractor for non fulfillment of the contractual obligations with regard to the production/ excavation (work) of specified quantity within the scheduled /specific time period. The work can be completed by engaging third party at the risk and cost of the contractor.

5.37 MEASUREMENT, WEIGHMENT, ETC.:

All the trucks carrying low silica limestone gitti product shall be weighed at the company/s weighbridge at Sanu Mines or at any other weigh bridge specified by the company. The weight recorded in the weighment slip shall only be considered & taken as final for determination of quantity of low silica limestone gitti product for the purpose of this contract.

5.38 DETERMINATION OF VARIOUS PARAMETERS

For the purpose of this contract the determination of following parameters as done by the Company or its authorized representatives shall be taken & treated as final and shall be binding on the Co-operative Society.

- 5.38.1 Chemical & Physical analysis of minerals, overburden, interburden, etc., (including moisture determination of minerals & proximate analysis) to determine purities/ grade of ore/ mineral/ etc., and also to classify any material as OB/ IB/ Waste material/ fines.
- 5.38.2 Measurement and calculation of excavation volume, if required.
- 5.38.3 Size determination of the mineral products like gitties, powder etc. including percentage of oversized & undersized material.
- 5.38.4 Weight of material dispatched in trucks as determined at Company's weigh bridge/ any other weighbridge notified by the Company.
- 5.38.5 Stock of mineral at the beginning of the Contract, during the period of the contract & at the termination of the contract.
- 5.38.6 Any other parameter whose determination may be required in terms of this contract.

5.38.7 The Co-operative Society, if it so desires, can associate its representatives during the determination of these parameters by the Company.

5.39 CONTRACTOR'S REMUNERATION:

5.39.1 The remuneration to be paid by the Company to the Contractor for the entire/whole of the work to be done and for the performance of all the obligations undertaken by the Contractor under the contract documents shall be ascertained by the application of the applicable contract rates and payments to be made accordingly for the work actually executed, weight recorded in as per weighment on the company's weighbridge at Sanu Mines. The sum as ascertained shall constitute the admissible remuneration of the Contractor under the contract. The Contractor shall not be entitled for any other payments, except as provided in the contract. The basis of payment shall be the dispatches of main limestone product (finished product in size range of 30mm to 80 mm limestone gitty) (refer 2.1.30) as recorded at company's weigh bridge at Sanu Limestone Mines or any other weighbridge authorized/notified by the company. No advance against undespached stocks shall be payable to the Co-operative Society.

5.39.2 The rates quoted and accepted by the contractor shall remain firm & fix except diesel escalation and binding during the currency of the contract period including extended period as mentioned in tender document. Rates shall be deemed to include and cover all cost, expenses and liabilities of every description and all risk of every kind to be taken in executing completing and handing over the work to the company by the Contractor. The Contractor shall be deemed to have known the nature, scope, magnitude and the extent of the works and materials required though the contract documents may not fully and precisely provide those.

5.39.3 Without in any way limiting the provisions of the proceeding sub-clause, the schedule of rates shall be deemed to include and cover the cost of all equipment, temporary works, materials, labour, insurance, fuel stores, and appliance to be supplied/deployed by the Contractor and all other matters in connection with each item in the schedule of quantities and the execution of the work or any portion thereof finished/completed in every respect and maintained as shown or described in the contract documents.

5.39.4 The schedule of rate/ agreed rates or contract rate or rate of remuneration shall include and cover the cost of all inputs for the works or otherwise incorporated in or used in connection with the works, also all rents and other payments in connection with obtaining diesel, lubricants, materials of whatsoever kind for the works and shall include an indemnify to the company which the contractor hereby gives against all actions, proceedings, claims, damages, cost and expenses arising from the incorporation in or use on the works of any such articles/processes or materials, other municipal or local board charges, fees, cess, if levied on materials equipment or machinery to be brought to site for use of work, shall borne by the contractor.

5.39.5 All customs duties, excise duties, sales tax or any port duties, special road tax, road tax, transport charges, stamp duties or Central or State Government or

local body or Municipal taxes or duties, cess taxes or charges (from or any other body), whatsoever as applicable upto the last date of submission of offer, shall be deemed to be included in and covered by the contract rate or schedule of rate by the contractor. The contractor shall also obtain and pay for all permits or other privilege necessary to complete the work.

- 5.39.6 The schedule of rates or contract rate shall be deemed to include and cover the risk of all possibilities of delay and interference with the Contractor's conduct of work which occur from any cause including orders of the Company in the exercise of his/its powers and on account of extension of time granted due to various reasons and for all other possible or probable cause of delay/s in execution of this work by the contractor. The Contractor shall not be entitled to raise any claim and/or dispute on account of any rise in the price of oils, lubricants, tyres, tubes, spares, statutory or otherwise on any other ground or reason of accounts whatsoever.

5.40 BASIS OF PAYMENT:

The basis of payment shall be the quantity, as dispatched of finished limestone product only from Company's crushing & screening plant at Sanu Mines, as recorded at RSMML weighbridge at Sanu Mines, or any other weigh bridge as notified by the company on monthly basis.

5.41 ARRANGEMENT FOR DIESEL

The Contractor has to make its own arrangements for Diesel procurement and storage. The Contractor has to obtain requisite statutory permission/clearances from the respective Government Authorities, at its own cost. However, company may on the request of the contractor allot the land in the mine premises for purpose of installation of Diesel Dispensing Pump subject to the condition that the contractor shall use the Diesel from that DD pump exclusively for the purpose of the contract.

In case, when As the diesel is required to arrange by the Contractor Co-operative Society, therefore then the diesel escalation shall be payable as per diesel escalation clause specified elsewhere in the tender.

5.42 DRILLING & BLASTING AND EXPLOSIVE

- 5.42.1 The Co-operative Society at its own cost & expenses shall do Drilling of the blast - holes and Jackhammer drilling in boulders. However the design & layout of the blast holes & pattern of blasting shall be as per directions of the Company.
- 5.42.2 The Company shall conduct the blasting at its own at the mines site of the co-operative society upto the charge factor ceiling of 0.60 Kg of explosive per tonne of finished product on quarterly basis, and will conduct the blasting for the contractor at his risk wherever required.

- 5.42.3 The Company shall procure/stock & arranges for the transportation of explosives and blasting accessories, blasters to the blasting site and will conduct the blasting.
- 5.42.4 The rates quoted by the contractor for this work shall be excluding of the cost of blasting i.e. the cost of explosives and its accessories (up to the charge factor ceiling as mentioned above), storage, transportation, etc. or otherwise.
- 5.42.5 The cost of the explosive quantities consumed by the Company at the contractor's pit in excess of the charge factor ceiling as mentioned above at sub clause will be recovered from the bills of the contractor. The reconciliation of actual charge factor as against the prescribed charge factor ceiling as mentioned above at sub clause will be carried out on quarterly basis considering the actual quantity of explosive consumed and total work done (specify) during respective quarters.
- 5.42.6 The recoveries for the quantity of explosive in excess of the charge factor ceiling as mentioned above at sub clause shall be made on quarterly basis from the running account bills of the contractor based on rates prevailing in respective quarter, inclusive of taxes, duties, freight etc.

Steps for calculation of such recoveries shall be as under.

Step 1. Calculation of weighted rate of explosives Rs/ unit of work (note it should be the same unit as offered by the contractor for the work).

The rate of the explosives in Rupees/Kg for the respective quarter shall be the weighted average calculated on the monthly basis for the quantities of explosives used during the respective month (rate of the explosive prevailing on the last day of month shall be considered)

Step 2. Calculation of total excess quantity of explosives

$$EQE = TE - (QP \times 0.60)$$

Where

EQE: Excess Explosives Qty in Kg

TE: Total Quantity of explosives used during the quarter in Kg

QP: Production of finished Product during the quarter in Tonnes

Step 3. Calculation of amount to be recovered from Contractor

a) $RA = (EQE \times \text{weighted average rate of explosives at Step 1})$

Where

RA: Recoverable Amount on account of explosives in Rs.

Note: For calculating charge factor ceiling, consumption of detonating fuse, electric detonators & cord relayed shall not be included. However, if excess quantity of explosive is consumed in any quarter then cost of detonating fuse, electric detonators & cord relayed for excess quantity shall also be taken care off.

- 5.42.7 The Company shall undertake Explosive Charging and other Blasting works. However, sufficient labours shall have to be provided by the Co-operative Society during these operations at its own cost & expenses.
- 5.42.8 Arrangement required for secondary/muffle blasting, if necessary, may have also to be done by the Co-operative Society for which no extra payment shall be made by the Company.
- 5.42.9 The Co-operative Society shall ensure that all persons within a radius of 500 meters from the place of blasting have taken proper shelter, apart from giving sufficient warning over the entire zone.
- 5.42.10 During the drilling of blast holes, the Co-operative society shall use dust extractors and practice wet drilling (including in-built wet drilling system) to ensure effective suppression of the dust generated during drilling. For wet drilling the Co-operative society will make its own arrangements for getting water at its own cost.

5.43 TERMS OF PAYMENT (BILLING):

For obtaining running account payment the contractor will submit a bill in triplicate to the Engineer In charge of the work/s executed during a month (calendar) before the expiry of the first week of the succeeding calendar month alongwith following details:

- i. The date wise monthly loading statement of product & by product.
- ii. Certificate from authorised dealer of HSD, for diesel price on 1st day of every month.
- iii. Copy of documentary evidence about deposition of the service tax to the respective authority for the concern billing period.
- iv. Copy of wages payment sheet of the previous months to the employees actually employed by the contractor at Mines. The details of the PF deducted in the respective period against the concern employee should be clearly shown.

Note:

a) **No payment shall be made** for any other ancillary work/production/dispatches of Sub Grade Material/By Product(s) etc. i.e. for the work not mentioned in the proforma of the price bid.

b) No advance against un-dispatched stocks/ or any other such cases where the basis of payment is not the actual production, shall be payable to the Contractor.

5.44 RATES:

The **agreed rates** shall be on the 'firm price' basis during pendency of the contract and the Contractor shall not eligible for any escalation, except as mentioned in the tender document.

5.45 LIMITATION OF PAYMENT:

5.45.1 If at any time the Company wants more work i.e. in excess of quantity beyond maximum tolerance as specified in tender, then the same shall be undertaken by the contractor on such term & conditions as may be mutually agreed to & approved by the company in writing in advance.

5.45.2 Payment shall be made only for the portion of work done by the contractor during the entire contract period.

5.46 ESCALATION/ DE-ESCALATION:

The diesel consumption norm of 1(one) liter per MT of finished product for entire work, as specified in scope of work, shall be treated for computation for diesel escalation /de-escalation. The price of diesel of IOCL for Jaisalmer Rs. Rs 63.12 per ltr. shall be considered as base price for this purpose. In case of increase/ decrease in prices of diesel, the diesel escalation /de-escalation shall be considered on above mentioned diesel consumption norm.

Beside it, no other escalation shall be payable to the contractor during the currency of the contract except for variation in statutory taxes, duties and levies as mentioned in the tender.

5.47 RUNNING ACCOUNT PAYMENTS TO BE REGARDED AS AN ADVANCE:

All running account payment (progressive payment) shall be regarded as payments by way of advance against the final payment only and not as payments for work/s actually done and completed, and shall preclude the requiring of bad, unsound, defective, unscientific, imperfect or unskilled work to be removed and taken away and reconstructed, rejected or be considered as an admission of the due performance of the contract, or any part thereof, in this respect, or of the accruing of any claim by the contractor, nor shall it conclude, determine or affect in any way the rights/powers of the company unless these conditions or any of them as to the final settlement and adjustments of the accounts or otherwise. The final bill shall be submitted by the contractor within **75 (Seventy Five) days = (60+15=75) days** from the date of his request for the completion certificate of the work, otherwise the Engineer-in-Charge's certificate of the measurement and of total amount payable for the work accordingly shall be final and binding on the contractor.

5.48 PAYMENT OF CONTRACTOR'S BILL:

Unless otherwise specifically provided, running account payment (progressive payment) will be made to the contractor by the company keeping in view the quantum of work done and measured, approved and certified as aforesaid. Company shall be entitled to deduct Income Tax & such other taxes at source from the bills of the contractor as may be required by any department of State/ central Govt. or any other statutory body including advances paid to the Contractor. The Contractor, on submitting the bill for the work done, is entitled to receive a monthly payment subject to approval and passing of the same by the Engineer-Incharge. The Company shall make payment due to the Contractor by crossed Account Payee Cheques/ RTGS/Pay advice. In no case

will the Company be responsible if the cheque is misplaced or misappropriated by unauthorized person/s. In all cases, the Contractor shall present his bill duly pre-receipted on proper revenue stamp.

5.49 WITHHOLDING PAYMENT TO CONTRACTOR AND COMPANY'S LIEN ON MONEYS DUE TO THE CONTRACTOR:

5.49.1 Progressive payment at any time may be withheld or reduced, if, in the opinion of the company the Contractor is not diligently and efficiently endeavoring to comply with the terms of the contract or if the Contractor fails to pay his labour, for material and other bills as they become due. The company shall in no way be responsible for such withholding of payments.

5.49.2 The company shall have lien on all amounts that may become due and payable to the Contractor under this or any other contract or transaction of any nature whatsoever between the Company and the Contractor and the security deposit, bank guarantee etc. furnished by him under the contract for or in respect of any debit or sum that may become due and payable to the Company by the contractor either alone or jointly with any other or others either under this or any other contract or transaction of any nature whatsoever between the Company and the Contractor, unless the contractor pays and clears the claim in full immediately on demand in cash to the company.

5.50 CLOSING OF THE CONTRACT:

5.50.1 Within 70 (Seventy) days= (60+10=70 days) of the completion of the work in all respects, as defined in the contract document, the Contractor shall be required to obtain from the Engineer-In-Charge completion certificates as to the completion of work and clearing of the areas where he has worked for of all rubbish, dirt, rock overburden, materials, structures etc.

5.50.2 If the contractor shall fail to comply with the requirement of this clause on or before the date fixed for the completion of the work, the Engineer-In-Charge may at the expenses of the contractor remove such rock (overburden) surplus material and rubbish and dispose off the same as he thinks fit and clean off such dirt as aforesaid and Contractor shall forthwith pay the amount of all such expenses so incurred and shall have no claim in respect of any such rock (overburden) material or surplus material as aforesaid except for any sum actually realized by the sale thereof.

5.51 APPLICATION FOR COMPLETION CERTIFICATE:

5.51.1 When the Contractor fulfils all his / its obligations under the contract to the satisfaction of Engineer-In-Charge and subject to terms & conditions of the contract he/it shall be eligible to apply for completion certificate. The application along with following documents and any other document/information etc. as required by the Engineer-In-Charge for his satisfaction, are required to be submitted to the Engineer-In-Charge.

(i) Details of quantum of work completed by the contractor.

- (ii) Three sets of calculation sheets (back up papers) thereof.

Additional Conditions of Contract

1. Correction of arithmetical errors

Provided that a Financial Bid is substantially responsive, the Procuring Entity will correct arithmetical errors during evaluation of Financial Bids on the following basis:

- i. if there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected, unless in the opinion of the Procuring Entity there is an obvious misplacement of the decimal point in the unit price, in which case the total price as quoted shall govern and the unit price shall be corrected.
- ii. if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and
- iii. if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail subject to (i) and (ii) above.

If the Bidder that submitted the lowest evaluated Bid does not accept the correction of errors, its Bid shall be disqualified and its Bid Security shall be forfeited or its Bid Securing Declaration shall be executed.

2. Procuring Entity's Right to Vary Quantities

- (i) At the time of award of contract, the quantity of Goods, works or services originally specified in the Bidding Document may be increased or decreased by a specified percentage, but such increase or decrease shall not exceed twenty percent, of the quantity specified in the Bidding Document. It shall be without any change in the unit prices or other terms and conditions of the Bid and the conditions of contract.
- (ii) If the Procuring Entity does not procure any subject matter of procurement or procures less than the quantity specified in the Bidding Document due to change in circumstances, the Bidder shall not be entitled for any claim or compensation except otherwise provided in the Conditions of Contract.

In case of procurement of Goods or services, additional quantity may be procured by placing a repeat order on the rates and conditions of the original order. However, the additional quantity shall not be more than 25% of the value of Goods of the original contract and shall be within one month from the date of expiry of last supply. If the Supplier fails to do so, the Procuring Entity shall be free to arrange for the balance supply by limited Bidding or otherwise and the extra cost incurred shall be recovered from the supplier.
