It occupies a place of pride in production and marketing of non metallic minerals in India. RSMML is multi mineral and multi location enterprise engaged in mining of Rock Phosphate, Lignite, SMS grade Limestone and Gypsum. RSMML is the leader not only in Mining & Selling of Rock Phosphate, Gypsum across the country, but also global pioneer in technology in open cast mining and mineral beneficiation of Carbonate Rock Phosphate. Besides minerals, RSMML has also forayed into Energy Sector and has setup 106.30 MW installed capacity Wind Power Project at Jaisalmer, Rajasthan.

1.2 PROFILE

THE BEGINNING & BEYOND

In 1942 M/s. Natural Science (India) Private Limited (NSIPL), a Calcutta based Company was granted a 5 years lease to mine Gypsum by the Ruler of the erstwhile Kingdom of Bikaner. In 1947 a long-term lease was granted to a newly formed Company called M/s. Bikaner Gypsum Limited (BGL). BGL was registered on May 7, 1947. The State and the public of Bikaner held 30% and 20% of its shares. The promoters of BGL held the rest. BGL appointed NSIPL as its managing agent for 20 years.

BGL was initially awarded a contract to provide 100,000 MT of Gypsum to the fertilizer plant producing Ammonium Sulphate. Later, the Company started selling Gypsum to cement plants all over the Country.

After the independence of India and subsequent merger of Bikaner State into the State of Rajasthan, the operations of BGL continued to flourish. Following the discovery of the Jhamarkotra Rock Phosphate deposit in Udaipur District of Rajasthan, BGL was appointed as the contractor for raising rock phosphate on behalf of the State in May 1970.

The magnitude of operations at Jhamarkotra and the need to develop the Rock Phosphate deposit rapidly on scientific lines led to the takeover of BGL by the Government of Rajasthan on 06.12.1974. The name of the Company was changed to the Rajasthan State Mines & Minerals Limited (RSMML). From 1974 to 1988, RSMML continued to work as contractors to Government for raising rock phosphate and also mined Gypsum as it had done previously. During this period, RSMML produced and marketed 6 million tones of rock phosphate and contributed more than Rs. 3000 million to the State Exchequer.

In April 1988, the Government decided to grant a lease for Rock Phosphate mining to the Company and RSMML became a full-fledged mining Company in its own right. It has not looked back since.

AMALGAMATION OF RSMDC WITH RSMML

On 20th February, 2003, the other Public Sector Undertaking in mining sector, Rajasthan State Minerals Development Corporation was merged with RSMML. The merger made the new entity a formidable force in the mining sector of India. Lignite, Gypsum and Limestone sectors received tremendous boost in terms of huge deposits and established production processes. The Company quickly resolved the issues emerged during the merger and started consolidating the mines spread in 8 districts of Rajasthan.

POST MERGER SCENARIO

Rock Phosphate continued its prime position in the business profile of the Company and catered to almost 94% of the indigenous demand during 2003-04 and 2004-05. The capacity of industrial beneficiation plant was increased from 1500 TPD and the production got streamlined

in 2004-05. The production of Lignite was streamlined at Giral and the Company is gearing up fast for providing one million tones of Lignite for the Lignite based Thermal Power plant coming up at Giral under State owned Company, Rajasthan Vidyut Utpadan Nigam Ltd. Being pioneer in the Lignite field, RSMML has ensured its strong presence in the Lignite based power sector in Rajasthan

The profit before tax for 2016-17 stood at Rs. 138.77 crore as against previous year figures of Rs. 200.33 crore. The Company started a number of R&D activities to further strengthen its R&D activities. Generous contributions were made for creation of life saving medical infrastructure in 8 project districts. The company has declared dividend of Rs. 38, 77, 57,500/- during the year 2016-17.
